MCH AWARDS \$14,975 TO FALLS CREEK PROJECT
FOR EXPO '74 MULTI-MEDIA EXHIBIT

MISSOULA--

The Montana Committee for the Humanities, which has home offices at the University of Montana in Missoula, has awarded \$14,975 to the Falls Creek Project for a multi-media exhibit which will be part of the Environmental Symposia Series of Expo '74 in Spokane, Wash.

Bruce R. Sievers, executive director of ^{the} MCH, said that the exhibit is being made in cooperation with the Northern Cheyenne Research Project and will focus on a movie involving the pro-con questions of the politics of coal energy and how it will effect the environment and the people of the Northern Cheyenne Tribe in southeastern Montana.

In conjunction with the media exhibit, Montana humanists also will participate in the topical conference series at Expo, providing an opportunity for an in-depth analysis of the specific issues raised by the production.

Following the summer-long presentation at Expo, the media show will be presented in several Montana towns during the fall and winter. Panel discussions involving academic humanists and representatives of differing viewpoints on the politics of the coal development issue also will be presented in the communities.

The director of the Falls Creek Project is Francis Mitchell of Missoula. Interested persons may obtain additional information from Mitchell by writing him in care of Box 1504, Missoula, Montana 59801.
